Yusuf İhsan Görgel

Software Engineer

Hello, I'm Yusuf İhsan, a final-year Software Engineering student with 4 years of experience in the field. I started freelancing in my second year and have since gained experience in both corporate and start-up environments. I have 3 years of professional experience, primarily focused on mobile, ERP, and POS software development using Flutter. Additionally, I've worked on Backend and DevOps tasks in various freelance projects. I'm passionate about problem-solving and excel in collaborative team environments. I have a solid background in using Atlassian-Jira for project management, with experience in daily stand-ups, sprints, scrum, and meeting tight deadlines.

Experiences

Full Stack Developer Juniustech June 2023 - February 2025

- Served as Mobile Team Lead in the Dorse project, managing development and deployment, assisting the frontend team, and coordinating with backend and QA teams.

Flutter Developer Uzman Adres March 2022 - October 2024

- I have worked on Pos, Barcode Sales systems, accounting management systems, ERP systems. We launched the FugaSoft project, I wrote the front end of the project with flutter. I gained experience in desktop and tablet applications. I took part in connecting pos device, weighing device and cash register to flutter with socket technology. I gained experience in complex SQL Architectures.

Full Stack Developer Promob TR October 2022 - June 2024

- I took part in freelance projects. I published 2 projects, these were Aydınlık E Newspaper and Bilim ve Ütopya E-Dergi. We used flutter on the front side, php-laravel and nodejs-expressjs-mongodb from time to time on the back side.

Projects

Dorse App

- I developed both the mobile application and the website for the project. The mobile app was built using Flutter, while the web platform utilized HTML, CSS, JavaScript, and React. The project incorporated technologies such as RESTful APIs, SOLID principles, Google and Apple Maps integration, and WebSocket communication to ensure a robust and efficient architecture.
- WebSite
- Play Store
- App Store

FugaSoft Pos - Sales Management Software

- I developed the Flutter front-end with SQLite-Drift, GetX, and i18n, using reactive programming. The app was deployed on Android/iOS tablets and desktop platforms (Linux, macOS, Windows).
- Mentor: Arge Team Lead Abdüsselam Kösecik
- WebSite

Aydınlık E-Newspaper

- I developed the front end of the project with flutter
- GetX was used in State Management, Dio was used in API calls. MVVM architecture was used as a general structure.
- Mentor : Senior Ferhat Balaban
- Play Store
- App Store

Bilim ve Ütopya E-Magazine

- I developed the front end of the project with flutter
- GetX was used in State Management, Dio was used in API calls. MVVM architecture was used as a general structure.
- Mentor : Senior Ferhat Balaban
- Play Store
- App Store

Education

Mehmet Akif Ersoy University

Software Engineering
2021-2025

Dursun Yalım Science High School

2015-2020

Skills

Flutter:
- **State Management**
- **RESTful API**
- **WebSocket**
- **Localization**
- **Google Maps**
- **Local Storage**
- **JWT Authentication**

Node.js:
- **Express.js**

Frontend:
- **HTML**
- **CSS**
- **JavaScript**
- **React**

Swift:
- **SwiftUI**

Databases:
- **SQLite**
- **MSSQL**
- **MongoDB**

AWS:
- **S3 Bucket**
